IMMUNOHISTOCHEMISTRY REPORT

ASCO-CAP ER/PR Test Guideline Recommendations: proportion of cells staining (0, no staining; 1, 1%-10%; 2, between 11% and 33%; 3, between 34% and 66% and 4, between 67% and 100% of the cells staining). Intensity of positive tumor cells (0, none; 1, weak; 2, intermediate; and 3, strong). Total score from 0 to 8.

Scoring system: "Her2"

Reference: ASCO-CAP Her2 Test Guideline Recommendations, 2013. IHC 0: as defined by no staining observed or membrane staining that is incomplete and is faint/barely perceptible and within < 10% of invasive tumor cells. IHC 1+: as defined by incomplete membrane staining that is faint/barely perceptible and within < 10% of the invasive tumor cells. IHC 2+: based on circumferential membrane staining that is incomplete and/or weak/moderate and within < 10% of the invasive tumor cells or complete and circumferential membrane staining that is intense and within < 10% of the invasive tumor cells. IHC 3+: based on circumferential membrane staining that is incomplete, intense < 10% of tumor cells.

Comment: Although Her2 is Negative, such cases (Score 1+) are predictive of response to Her2-Targeted drug conjugates (ADCs) according to latest 2023 ASCO-CAP guidelines.
