تقرير طبي

السيد

تحية طبية وبعد,,

بشأن تقرير طبي للمريض

إيماء للطلب المقدم من

رقم طبي:

بقسم:

نتشرف بأن نوضح فيما يلي تقريراً عن حالته

تاريخ وساعة الخروج :
PM 01:17 05-07-2026

تاريخ وساعة الدخول :
-- --:-- yyyy-mm-dd

وبعد الكشف والفحوصات والمتابعة وجد أنه

المریضة تعاني من ورم غير حميد بالثدي و تحتاج الي Contrast-enhanced CT Chest & abdomen and pelvis

الوقت :

-- --:--

التاريخ :

05-07-2026

MDT FORM

13/1/2026 G

Name	أحمد محمد	MRN	39723
Age	46 y.o.	ID	SV9-CC61C-55IV
Menopausal status	premenop	Phone	01014519599
NRS SCORE	PS 0-1	Marital status	married
BMI		Family history	
CO morbidity	free	REASON OF MDT	New Case

Clinical Data

BX:	IDC GIII	R	
ER:	8/8	PR:	8/8
HER 2:	+2	Ki67:	15%
Sonomammography:	(4-2.25) pt rec. NACT D.D AC x 4		
Mets Workup:	D.D Taxol x 4 the ut BCS → yPT yPN pct ser → rfr		

Recommendations: rec PORT last 25-12-2025
pt rec Zoladex + AI ant side since (20-2025)
Com to us to continue her Zoladex + AI

MDT OUTCOME & PLAN: AI + Zoladex (5y all)
+ Tamoxifen

تاريخ وساعة الدخول :	تاريخ وساعة الخروج :	
وبعد الكشف والفحوصات والمتابعة وجد انه The patient was prescribed an aromatase inhibitor (Arimidex) in combination with zoledronic acid (Zoladex) at a dose of 10.8 mg administered every three months. Investigations were ordered to be performed at the next follow-up visit after the three-month interval.

Name: ایمان السيد معتمد

Age: 46 years

Gender: female

Referred by prof.: Islam Al-Zahaby

Date: 30/5/2025

Path code: 2505061

Clinical data: suspicious left breast mass. Tru-cut biopsy for histopathological examination.

HISTOPATHOLOGY REPORT

Gross features:

- Multiple tissue cores, the largest is 7 mm, totally submitted.

Microscopic picture:

- Slides prepared from the tru-cut biopsy revealed breast tissue with infiltration by malignant tumor tissue arranged into solid sheets with small areas of tubular differentiation. These are composed of epithelial cells exhibited high degree of cytologic atypia with frequent mitotic activity. The surrounding stroma is desmoplastic. Associated high grade DCIS component is present.

Diagnosis:

- Grade 3 infiltrating duct carcinoma.
- Associated high grade ductal carcinoma in-situ component.

Name: ايمان السيد معتمد

Referred by prof.: Mohamed Hegazy

Age: 46 years

Date: 4/6/2025

Gender: female

Path code: 2505061IHC

Clinical data: A case of breast cancer, for immunohistochemistry for ER, PR, HER2, Ki67.

IMMUNOHISTOCHEMISTRY REPORT

Technique:

- Automated immunohistochemical staining was applied to coated slides by using specific monoclonal antibodies against ER, PR, HER2 & ki-67 and Envision-peroxidase kit from DAKO. DAB was applied as chromogen.

Immunohistochemical results:

- ER: Strong positive nuclear reaction in (more than 66%) tumor cells (Allred score 8/8).
- PR: Strong positive nuclear reaction in (more than 66%) tumor cells (Allred score 8/8).
- HER2: weak complete membranous reaction in more than 10% of tumor cells (score 2+).
- Ki-67: Positive nuclear reaction in 25% of tumor cells.

Summary:

- ER: Positive (Allred score 8/8).
- PR: Positive (Allred score 8/8).
- HER2: Equivocal (score 2+).
- Ki-67: Positive (25%).

Pathology Report

Patient's Name: ايمان السيد معتمد
Referred by: Prof. Dr. Saleh Teima
Path. Code: 1000

Sex/Age: Female / 45.0 year

Date: 03/08/2025

VCode: J25080098

AlNafis.com • 11-08-2025 12:37 AM

Clinical: - Lt. breast G II infiltrating duct carcinoma, Her2 IHC weak positive (score +2), for FISH of HER2 gene amplification.

Gross: Paraffin block labeled 2188/25 was received. Fluorescent in situ hybridization (FISH) assay for the quantitative determination of HER2 gene amplification was performed by applying HER2 IQFISH pharmDx from Dako Corporation. This is specific for Formalin-fixed paraffin-embedded breast cancer tissue. This was performed then examined by Olympus Fluorescent microscope BX34, applying DAPI, FITC, and Triple filter (DAPI/FITC/Texas red).

Microscopic: After examination of 40 intact nuclei, the total ratio of HER2/CEN-17 by dividing the total number of red HER2 signals (average 3 dots/nucleus) by the total number of green CEN17 signals (average 2 dots/nucleus) = 1.5

Diagnosis: The total ratio of HER2/CEN-17 = 1.5 with average HER2 copy number 3.0 signals/cell: HER2 gene Not Amplified. (see note).

Notes: According to the ASCO/CAP HER2 testing recommendations 2018 the result falls in ISH Group (5) (IHC score +2 with FISH Her2 score < 2). The overall HER2 status is considered NEGATIVE.
